

**Draft Guide to the Framework for the Economic Assessment of International
Commercial Law Reform**

Table of Contents

Draft Guide to the Framework for the Economic Assessment of International Commercial Law Reform	1
Foreword	3
I. Purpose and origin of the Framework.....	4
A. Background.....	4
1. Purpose of the EA Framework.....	4
2. History and development of the Framework	4
B. Introduction to the Framework.....	4
1. General objective.....	4
2. Definitions	4
C. Assumptions and Limitations	4
1. The EA Framework’s limitations	4
2. Underlying assumptions when using the EA Framework.....	4
II. Contexts in which the Framework can be applied	5
A. Temporal/Time-related contexts	5
1. When to conduct the assessment?	5
2. Time constraints on the data.....	5
B. Geographical contexts.....	5
1. Global.....	5
2. Domestic or regional	5
C. Nature of Law Reform	5
1. Hard Law	5
2. Soft law	5
3. Nature of the Rule or Law: Promotional Law v. Reactive Law	5
4. Existence, or not, of prior regulation	5
D. Administrative contexts	5
1. Who conducts the EA?	5
2. For whom?.....	5
3. Who is involved?.....	5
III. The Variables	6
A. Data and causation.....	6

1. Quantitative and qualitative data.....	6
2. Scope of causation.....	6
3. Sources	6
B. Content of each variable	6
Variable A: The net, direct impact of the new rules, rather than those applicable in the absence of reform, applied ex ante or ex post	6
Variable B: The net, impact of the new rules as a network, that is, the existence of international rules, applied ex ante or ex post	6
Variable C: The net, systemic, including developmental, impact of the new rules, rather than those applicable in the absence of reform, applied ex ante or ex post	6
Variable D: The extent, measured from 1 to 0, that the new rules have been or will be effectively applied by courts and authorities.....	6
Variable E: The expected (ex ante) or actual (ex post) net cost of creating and transitioning to the new rule. E does not increase over time.....	6
C. Relationships between the variables	6

Foreword

I. Purpose and origin of the Framework

A. Background

- 1. Purpose of the EA Framework*
- 2. History and development of the Framework*

B. Introduction to the Framework

- 1. General objective*
- 2. Definitions*

C. Assumptions and Limitations

- 1. The EA Framework's limitations*
- 2. Underlying assumptions when using the EA Framework*

II. Contexts in which the Framework can be applied

A. Temporal/Time-related contexts

1. *When to conduct the assessment?*
2. *Time constraints on the data*

B. Geographical contexts

1. *Global*
2. *Domestic or regional*

C. Nature of Law Reform

1. *Hard Law*
2. *Soft law*
3. *Nature of the Rule or Law: Promotional Law v. Reactive Law*
4. *Existence, or not, of prior regulation*

D. Administrative contexts

1. *Who conducts the EA?*
2. *For whom?*
3. *Who is involved?*

III. The Variables

A. Data and causation

1. *Quantitative and qualitative data*

2. *Scope of causation*

3. *Sources*

B. Content of each variable

Variable A: The net, direct impact of the new rules, rather than those applicable in the absence of reform, applied ex ante or ex post

Variable B: The net, impact of the new rules as a network, that is, the existence of international rules, applied ex ante or ex post

Variable C: The net, systemic, including developmental, impact of the new rules, rather than those applicable in the absence of reform, applied ex ante or ex post

Variable D: The extent, measured from 1 to 0, that the new rules have been or will be effectively applied by courts and authorities

Variable E: The expected (ex ante) or actual (ex post) net cost of creating and transitioning to the new rule. E does not increase over time.

C. Relationships between the variables
